Daikin has a focus and track record of quality

Daikin has created a global indoor comfort revolution with innovative new technologies and products that have brought firsts to the world. From the introduction of new compressor designs or new ways to precisely control refrigerant flow, Daikin strives to be a global leader by investing in technology. We bring this same focus on innovation to North America, applying our portfolio of product features from around the world to meet the challenges we face in North American homes and businesses.

A full range of styles and options for every home, and every room

Daikin single and multi-zone systems are an ideal solution to displace traditional systems in primary living spaces or for refurbishing and remodeling additional spaces. They have a modern design and are extremely quiet in operation. Our heat pumps are all-in-one heating and cooling solutions, meaning comfortably warm in winter and cool in summer. Daikin ductless systems offer:

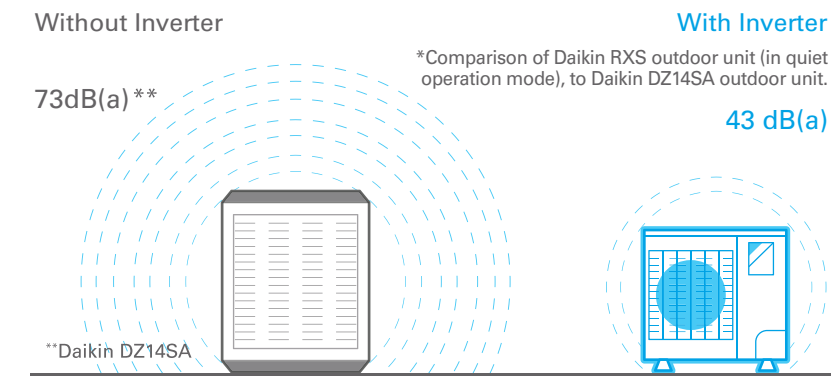

- » High-quality, energy-efficient comfort solutions with *Air Intelligence*
- » Differentiated product offerings that help deliver ideal comfort to single and multi-zone spaces
- » Award-winning indoor unit designs to help meet interior décors
- » Outstanding limited warranties*

* Complete warranty details available from your local distributor or manufacturer's representative or at www.daikincomfort.com.

Technology that makes a difference

As you think about the functionality of your home's indoor comfort system, the Daikin portfolio of solutions is ready to help you achieve control, energy efficiency and long-term peace of mind. Take that attention to quality one step further by considering a state of the art Daikin brand variable-speed, inverter, energy-efficient system. We have designed and engineered all of our products to provide years of consistent indoor comfort — delivering you and your family the type of comfort you never thought possible.

One of the benefits of Daikin Inverter technology is low operational sound levels. By operating at a more energy-conserving speed and because of the elimination of the constant ON/OFF, inverter technology provides homeowners with a new level of acoustical comfort indoors and out.

Daikin LV Series Wall Mount

ENERGY STAR®

Proper sizing and installation of equipment is critical to achieve optimal performance. Split system air conditioners and heat pumps must be matched with appropriate coil components to meet ENERGY STAR® criteria. Ask your contractor for details or visit www.energystar.gov.

3-D Airflow

Combines vertical and horizontal auto-swing to circulate cool/warm air to the corners of large spaces.

Titanium Apatite Photocatalytic Air-Purifying Filter

This filter combines the air-purifying filter and titanium apatite photocatalytic deodorizing filter in a single highly effective unit. The filter can last for up to three years without replacement if washed once every six months.

Inverter Technology

The principle is simple: inverters adjust the power used to suit the actual requirement – no more, no less! Single and multi-zone systems deliver the capacity required to maintain desired room conditions, typically reducing energy consumption by up to 30% or more compared to traditional fixed-speed ducted systems.

AND ENERGY REDUCTION OF UP TO 30% AT
WWW.DAIKINCOMFORT.COM/GO/INVERTER/

Intelligent Eye

The intelligent eye is an infrared sensor with the ability to sense movement in the room. When you are in the room, the air conditioner operates normally. If you leave the room for more than 20 minutes the air conditioner automatically changes to an energy-saving operation. Using the intelligent eye, savings of up to 20% in cooling and up to 30% in heating can be achieved compared to units without this feature.

Control from Anywhere

Daikin Comfort Control App and DKN App for Wi-Fi control of your Single and Multi-Zone System*

It can happen to anyone. You forgot to change the temperature of your heat pump system or air conditioner before leaving the house or you will be delayed returning home and wish to avoid needlessly heating or cooling your home. What in the past would have resulted in wasted energy is no longer a problem. With the Daikin Comfort Control App or DKN App, you are always in control. You can use your tablet or smartphone to access your Daikin system via the internet. Fault conditions can also be detected remotely, allowing a quick response to problems.

*Requires BRP072A43, AZAI6WSCDKA or AZAI6WSCDKB Wi-Fi adaptors or AZAI6WSPDKC DKN Plus Interface depending on the indoor unit
